

CCAP OVERVIEW

The C-CAP System

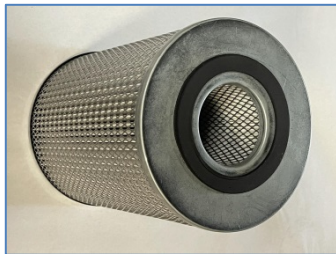

The C-CAP is a Cabin-air Pressurizer and Filtration System engineered and field tested to not only be rugged but to supply the cleanest possible air to for operators.

- Rugged HD Powder coated metal construction with reinforced housing
- German engineered brushless motor (1.3 amps @ 24 VDC)
- Motor located post-filtration for enhanced longevity
- Metal precleaner removing 95% of debris before it ever gets to filter
- cTUV, CE, CSA Certified
- 30 Years on market
- **211X** cleaner than leading brand (RESPA) (using filter ECO9990)

The C-CAP Filters

The C-CAP Filters are all rated at or above HEPA and MERV16 Standards per independent testing and validation. With multiple stages, these filters are excellent at removing particles down to 0.1 microns, removing vapors w/ exceptional life expectancy.

MEETS THE FOLLOWING STANDARDS:

- ✓ MERV 16
- ✓ HEPA
- ✓ EN 15695 (Europe)

Part Number	Description	HEPA?	Merv16?
<i>ECO9990</i>	XL PARTICULULATE & VAPOR FILTER 99.90% Efficient at 0.3 microns, Organic vapor removal, Long Life Filter	✓	✓
<i>ECO9999</i>	XL PARTICULULATE & VAPOR FILTER 99.99% Efficient at 0.3 microns, Organic vapor removal, Long Life Filter	✓	✓
<i>ECO9990NH3</i>	XL PARTICULULATE & AMMONIA FILTER 99.90% Efficient at 0.3 microns, excellent ammonia vapor removal, Long Life Filter	✓	✓
<i>ECO9999NH3</i>	XL PARTICULULATE & AMMONIA FILTER 99.99% Efficient at 0.3 microns, ammonia vapor removal, Long Life Filter	✓	✓
