

MINING GRADE LED • D8T DOZER MOUNTING BRACKET

LIGHT THE WORK AREA, FULLY.

EcoPro Mining Grade LEDs, mounted clear of the D8T cab deflector.

5"×8"

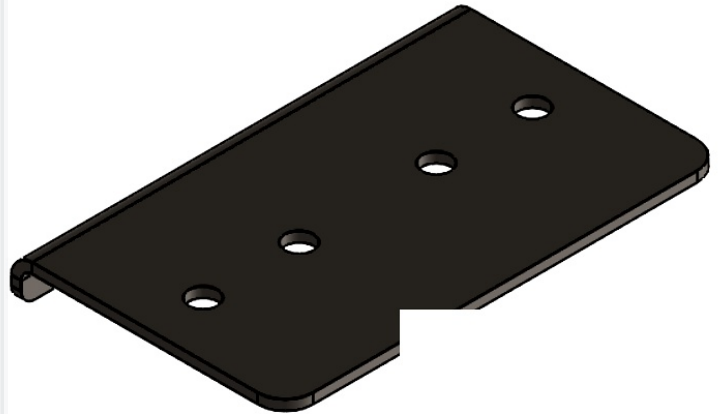

bracket plate

D8T

Caterpillar dozer

USA

made in America

Clears the Deflector

Extends the LED fixture forward and past the cab obstruction.

Full Beam on Target

No light lost to structure — full output reaches the work area.

Mounts to Existing Hardware

Bolts directly to the cab. No custom fabrication needed.

BUILT FOR THE WORK SITE

EcoPro Mining Grade LED lights are engineered for heavy earthmoving and mining operations — delivering the high-output illumination operators need to work safely and efficiently during night shifts and in low-visibility conditions.

THE DEFLECTOR PROBLEM

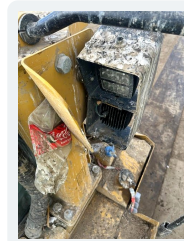

On the Caterpillar D8T Dozer, the cab's front deflector blocks the light beam when LEDs are mounted in the standard position, directing output into the cab structure rather than the work area ahead.

HOW THIS BRACKET SOLVES IT

The D8T LED Mounting Bracket positions the fixture forward and clear of the deflector so the full beam reaches its target. It bolts directly to existing cab hardware — no fabrication. no guesswork. no downtime.

SERVICE PARTS

PART NUMBER	DESCRIPTION
D8T-LED-BKT	LED Mounting Bracket — Caterpillar D8T (KPZ configuration)
D8T-LED-HDW	Replacement Hardware Kit for D8T LED Bracket

EcoPro Mining Grade LED on Cat D8T Dozer

BRACKET SPECIFICATIONS

Product:	D8T LED Mounting Bracket
Plate:	5.00" × 8.00"
Holes:	4× Ø.51" through all
Finish:	Powder-coated steel
Fits:	Cat D8T / EcoPro Mining Grade LED
