EZ3-KIT Savings up front and operationally

One EZ3 kit puts three proven upgrades on a machine at its rebuild. It costs less to buy, and it keeps saving every year the machine runs.

SAVINGS PER MACHINE, OVER A SIX-YEAR LIFE

Compared with fitting a Sy-Klone precleaner, a RESPA cab pressurizer and a CAT OEM LED upgrade.

THE THREE SOLUTIONS IN EVERY EZ3 KIT

All three installed on a rebuilt CAT dozer. EZ3 kits are built for dozers, packers, loaders and excavators, matched to the serial number prefix.

1	ENGINE AIR Turbo II HD PreCleaner 3 to 5x longer engine air filter life	\$5,120 saved in upkeep
2	OPERATOR AIR CCAP Cabin Air Pressurizer 99.998% filtration at 0.3 micron, 2,000-hour filter life	\$7,700 saved in upkeep
3	VISIBILITY LED HD Lighting Mining-grade H30 LEDs with more than twice the light output	\$2,250 saved in upkeep

How it adds up

\$3,900 at the rebuild + \$5,120 + \$7,700 + \$2,250 in upkeep = **\$18,970 saved per machine**. Every kit arrives ready to install, with the brackets, adapters and hardware for that machine.

Spec an EZ3 kit for your next rebuild
