One Kit. One Machine. Up to 100 Parts. Zero Guesswork.

Every EZ3 kit is purpose-built for a specific machine - not a generic fit. Each package contains up to 100 purposefully chosen components, from the Turbo II HD precleaner to LED upgrades, CCAP cabin pressurizer, HVAC access doors, and every adapter, bracket, and fastener needed for a clean install.

We go down to the detail of mitering install brackets to fit around handrails on newer D8T dozer configurations. Nothing is left to chance - every part is verified against the machine's serial number prefix so techs can install with confidence, not improvisation.

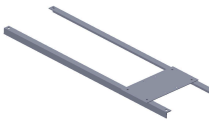
WHAT'S IN AN EZ3 KIT

- Turbo II HD Engine Air PreCleaner (machine-specific sizing)
- C-CAP Clean Cabin Air Pressurizer system
- Full LED light upgrade (10+ LEDs + engine bay LED)
- Amber beacon (flanged or magnetic mount)
- HVAC access door for filter service
- Metal exhaust adapter (sized to machine)
- All mounting brackets - mitered to fit existing geometry
- Complete fastener hardware kit
- Machine-specific installation guide



> ***"Every component in an EZ3 kit is chosen for that machine and that serial number prefix. If it ships, it fits."***
